

6516207020.txt

I would like to add my support for satellite radio. The services provided, particularly in the areas of traffic and weather are timely and accurate and provide a valuable public service, that the broadcast radio stations have not provided for the most part. There are few "news" format stations on the broadcast spectrum. The rest only provide the needed information after numerous "teases", the important information is sandwiched. Please reject the NAB petition 04-160.

Thank you,  
Dr. Luther L. Knight
